What we do

Five kinds of work. *One plumber.*

Whole-home repiping	Our specialty. Old galvanized or polybutylene lines replaced with PEX or copper.
Drain cleaning	Sinks, tubs, toilets, main lines. No chemicals down the pipe.
Water heaters	Tank and tankless. Repair or replace, old unit hauled away.
Leak detection & repair	Walls, ceilings, floors, slabs. We open only what is needed.
Repairs & fixtures	Faucets, toilets, disposals, valves. Small jobs welcome.

How the free estimate works

1. **Call or scan.** Tell us what is going on. A photo helps.
2. **We come and look.** For a repipe, a walk-through of the whole house.
3. **You get the full price before any work.** Then you decide. Saying no costs nothing.
